

INTRODUCING THE

**The absolute best way
to avoid getting soaked by a plumbing leak.**

DETECTS WATER FLOW OF LESS THAN ONE CUP PER HOUR!

The Leak Defense System (LDS) installs on your home's incoming water line and monitors water flow 24/7/365. It can detect water flow of less than 8 oz. per hour. That's less than a cup! It not only protects your home from damage due to a leaking or burst water pipe, it can also alert you to leaking plumbing fixtures or hidden leaks in slab foundations or behind walls.

USER FRIENDLY PANEL LET'S YOU CONTROL THE FLOW.

Simple touch screen panel gives you total control over water flow coming into your home by allowing you to set the maximum flow rate and elapsed flow time before an alarm is triggered.

AUTOMATICALLY SHUTS OFF WATER IF A LEAK IS DETECTED.

If water flow exceeds your pre-set limits, the LDS alerts you. If the alert is ignored, it automatically shuts off water to your home—potentially saving you thousands of dollars in damages and the nightmare of having your possessions destroyed.

PROGRAMMING OPTIONS HELP PREVENT FALSE ALARMS.

The LDS can be programmed to reduce false alarms during normal water usage such as baths, washing machine use, dishwasher use, etc., while still maintaining a safety net to prevent major water damage from a leaking pipe inside your home.

WORKS WITH ANY TYPE OF PIPE.

The LDS fits any type and
size pipe from 3/4" to 1-1/4."

- Stops leaks automatically before water damage occurs!
- Provides peace of mind for building owners, renters, builders and insurance companies!
- May help reduce insurance claims!
- Fits inside a standard stud wall!
- Can be networked to control up to 256 units from one centrally located control panel!
- May reduce water consumption!
- Can communicate with 3rd party monitoring services!

The LDS can detect plumbing leaks as low as 8 oz. per hour!

USER FRIENDLY PANEL LET'S YOU CONTROL THE FLOW.
